

What's in the Box

Images not to scale.

Display

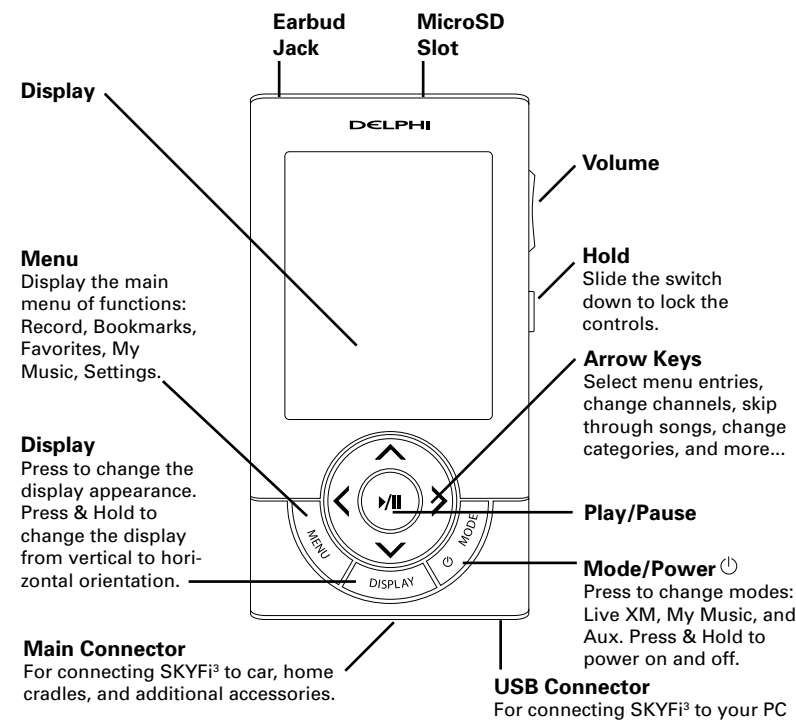

Display Options

Your SKYFi³ display can be changed from portrait to landscape orientation by pressing and holding **Display**.

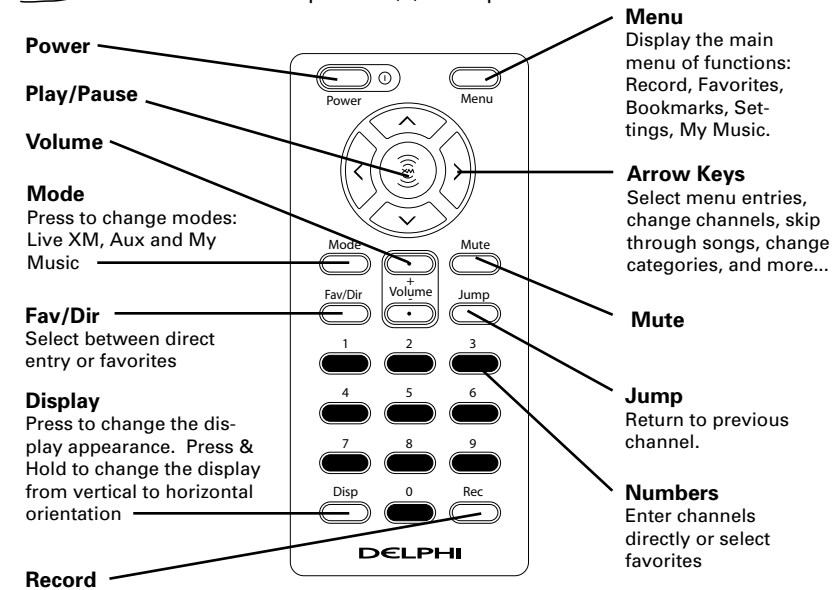

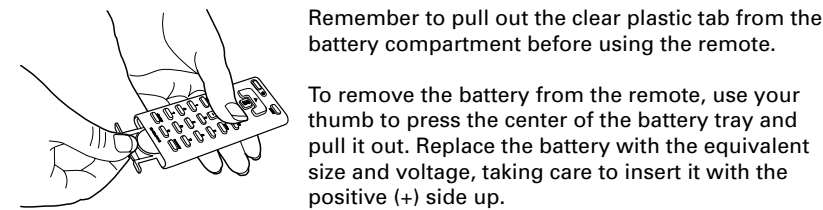

Pressing the **Display** button toggles among standard display, display with Info Extras (stocks and sports), and large font display.

Controls

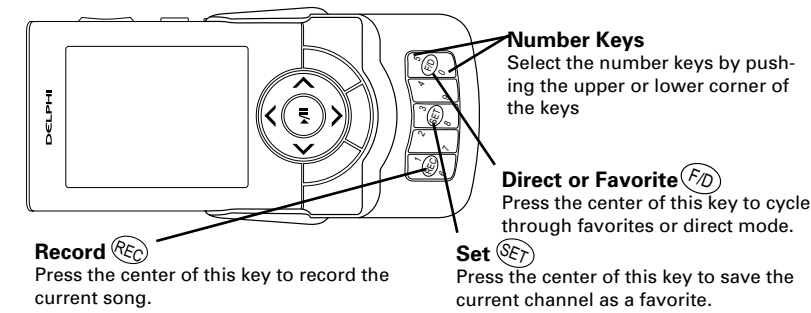

TO TURN ON THE UNIT: Press & Hold the **Mode/Power** button. Use the left arrow key to exit or go to the previous menu.

Remote Control

Using SKYFi³ in Your Vehicle

General Reference

Placing the Antenna

For best reception, place the antenna on the vehicle's metallic roof, at least 6" from any window or sun roof.

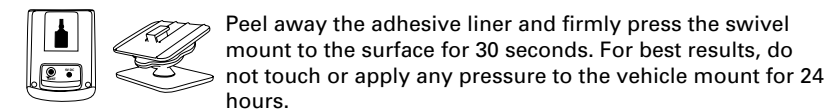

If the car is a soft-top convertible, you may mount the antenna on the metal trunk lid. It should be at least 4" from the rear window. Ensure that the antenna and cable don't interfere with the opening or closing of the convertible top and trunk.

Note: You must use the XM SureConnect to connect the antenna to your SKYFi³. Please read the XM SureConnect guide before installing.

Mounting SKYFi³ in Your Vehicle

Swivel Mount

Find a suitable location on the dash of your vehicle; the mount uses a strong adhesive and could be difficult to reposition after installation. Do not install this mount on a leather surface. Make sure the air temperature is at least 60°F. Clean the mounting surface with the surface preparation cleaning kit, following the directions on the package.

To remove the mount, lift the adhesive pad with your fingers or a spoon. You may warm it with a hair dryer for 2 to 3 minutes to help soften the adhesive. Remove any leftover adhesive from the dash surface by rubbing with your finger, or use a mild cleaner as recommended by your vehicle's manufacturer.

Caution: Never use a commercial heat gun or paint-stripping gun. This could result in damage to the unit or to your vehicle.

You can adjust the tension of the swivel mount by rotating the tightening wheel. Base of mount can be rotated to accommodate vertical and horizontal surfaces.

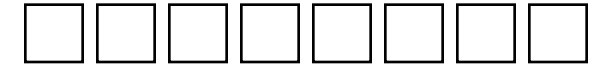

Vent Mount

Find an air vent that is strong enough to hold your SKYFi³ and its cradle. Clip the vent mount on to the vent by pulling back on the spring arms. To remove the mount, pull back on the spring arms and release the mount's hooks from the vent vanes. Carefully extract the mount. The mount can be installed on horizontal or vertical vanes by turning the mount's base. Insert the SKYFi³ player into the cradle. Connect the power and antenna.

Activating SKYFi³

1. Set up your player, car cradle, and antenna.
2. Turn the unit on and make sure it is in "Live XM" mode.
3. Use the arrow buttons to find channel 0, then push the **Play/Pause** button to choose it. You should see an 8-character XM Radio ID on the display (the XM Radio ID should also be on the bottom of your SKYFi³ and on the package).

4. Write the XM Radio ID here:

Note: Please check your ID code carefully. There is no "l" (eye), "o" (oh), "s" or "f" used. You may wish to double-check your ID code on the outside of your tuner box.

5. Activate your XM Satellite Radio service by contacting XM at:

<http://activate.xmradio.com> or call 1.800.XM.RADIO (1.800.967.2346).

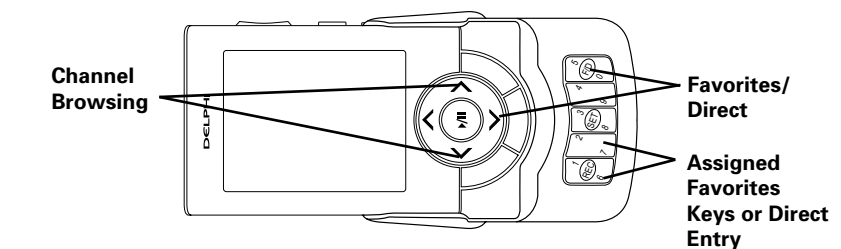

<https://activate.xmradio.ca> or call 1.877.GET.XMSR (1.877.438.9677)

You will need your XM Radio ID and a major credit card.

XM will send a signal from the satellites to activate the full channel lineup. Activation normally takes 10 to 15 minutes, but during busy periods, you may need to keep your SKYFi³ on for up to an hour to complete your activation process. When you can access the full channel lineup on your SKYFi³, you're done.

Live XM

Listen to Live XM content with your SKYFi³ docked in the car cradle. You can select channels directly, browse a list of channels, browse through categories of channels, and/or set up a list of favorite channels and presets.

Recording Live XM

Your SKYFi³ can record XM content while you are listening to Live XM or by scheduling a recording session. When listening to Live XM, you can record the current song or begin recording the current channel.

- Record the current song by pressing and holding **Menu** or by pressing **REC** on the car dock.
- Record the current channel by pressing **Menu**, selecting "Record," scrolling to "Record Channel", and pressing **Play/Pause**.

Press **Menu**, select "Record" and "Stop Recording" to stop recording.

Warning: When using this product in the car, it is important to keep your eyes on the road and your hands on the wheel. Not doing so could result in injury or death to yourself or others and/or in property damage.

Playing and Managing Recorded Content

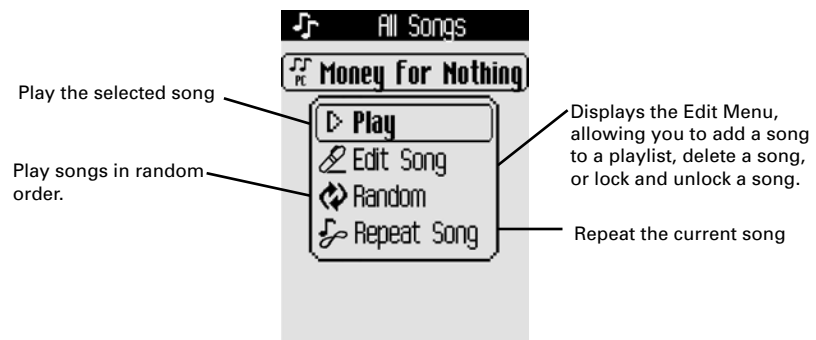

To listen to recorded XM content or other stored music (see “Using SKYFi³ with your PC), switch your SKYFi³ to My Music mode by pressing **Mode**. You will see “My Music” on the top of the display.

NOTE: Please make sure your battery is fully charged (three hours) before using your SKYFi³ on battery power.

Press the up and down arrow buttons to scroll through a list of your songs in the order that they were recorded. Press **Play/Pause** to play the song.

You can skip forward and backward through your recorded music while listening by pressing the left and right arrow keys to skip to the previous and next song respectively.

Press **Menu** from the song list to see the Menu.

In addition to accessing a list of your songs in the order that they were recorded, you can also access your music by artist, category, channel, and recording session.

While listening to a recorded song, press **Menu**. Scroll to “Find” and press **Play/Pause** to select it.

Playlists

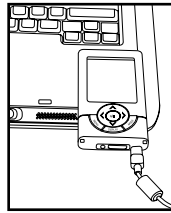

In addition to organizing your songs by artist, category, channel, and recording session, you can create your own custom playlists. Playlists contain a list of songs that are organized to play in a certain sequence. You can add a song to more than one playlist. You can also add all songs for an artist, category, channel, or recording session to playlists from any artist, category, channel, or recording session list.

SKYFi³ and Your PC

Installing XM+Napster

Before you install XM+Napster, make sure that your radio is activated and that you know your Radio ID. Make sure your SKYFi³ is not connected to your PC. Insert the included CD into your computer's CD drive. Choose the “XM+Napster Install” option from the main menu. Follow the directions on the screen. Once installation is complete, close the XM+Napster CD window, eject the CD, and restart your computer. Once your computer restarts, launch XM+Napster, plug your SKYFi³ into your PC using the USB cable, and you're ready to go.

You will need to register for XM+Napster Light or subscription XM+Napster service. Click “File/Sign In” on the XM+Napster program. Click the link next to “Not a Registered Member?” You will need your XM Radio ID and the billing zip code to register.

XM+Napster Light, allows you to manage XM content and digital audio files (MP3/WMA) on your SKYFi³'s MicroSD card, purchase songs and/or albums, and listen to XM Radio Online. In addition to these features, subscription XM+Napster allows you to download and listen to Napster's entire music library for a monthly fee. You will need a credit card to register for subscription XM+Napster.

XM+Napster

XM+Napster Features

- Transfer digital audio files between a MicroSD Card in your SKYFi³ and your PC (MicroSD Card not included)
- Manage your music, playlists, and recording sessions on your SKYFi³
- Search for and purchase music from XM+Napster
- Listen to XM Radio Online.

Check out XM+Napster's Help Menu for more information.

Other Things You Should Know

Care

You should be able to use your SKYFi³ during most of your daily activities. However, you should remember:

Caution: Refrain from using food or drinks near your SKYFi³. Spilling food or drinks on the unit can damage it. Also, improperly installing the antenna cable can cause leaks, which can damage your SKYFi³ and/or your vehicle.

- If your SKYFi³ does get dirty, wipe the case with a soft cloth (lightly moistened with water if necessary), then wipe dry with another cloth. Avoid chemicals such as paint thinner, alcohol, or abrasive cleansers.
- It is best to keep your SKYFi³ out of direct sunlight or other sources of extreme heat.

Accessories (sold separately)

We're always developing useful and clever accessories for your SKYFi³ such as a home kit, signal repeater, live wearable kit, and additional car kit. Visit our web site www.shopdelphi.com or your favorite electronics retailer to purchase accessories.
